

## StocksAG Fan Jet Mini

### Description

The Fan Jet Mini is designed for 'restricted width' spreading (slug pellets, other small seeds). Sharing most of the features of the Fan Jet Plus, the Mini has a smaller diameter spinning disc which limits the spread width to 12m. There is no spread bias adjustment on the Fan Jet Mini.

The Fan Jet Mini is available with either a 65, 130 or 240L hopper, and can be supplied with either Vari-Speed or i-CON Control.
