

StocksAG Turbo Jet 8

Description

The Turbo Jet 8 is a versatile and accurate pneumatic applicator and seeder and will deliver product up to 8m working width, through its 8 outlets. Commonly used for applying clover seed, full-rate grass reseeds, Avadex and cover crops, the Turbo Jet can be calibrated to apply precise rates across a wide range of products from 1kg/ha to more than 100kg/ha (dependent on product, working width and forward speed). It can be fitted to a wide variety of machines, from grass harrows to cultivators and rolls, as well as being employed as an additional applicator on a grain drill.

The Turbo Jet 8 is available with either a 240L or 400L hopper, and can be supplied with either VS-2 or i-CON Control.

Please make contact before travelling to view machinery to find exact location.
